MATTRESSES

... an invitation to pure enjoyment.

Lie back and relax during the day or wind down for a restful night's sleep.

Feeling completely at ease and in the knowledge that all is well.

A perfectly designed system for a well-balanced, healthy sleep.

We wish you a good night.

TIPS FOR BUYING A MATTRESS

Good decisions take time

Take the time to make your decision—and to have an in-depth consultation at a specialist store.

Mattress firmness levels are not standardised

Do you prefer a firm or a soft mattress? What type of mattress are you currently using: pocket spring core, spring core, cold foam or latex? This is important information for your advisor to know, as mattresses come with various, non-standardised firmness levels. The following categories serve as a rough indicator:

Firmness level 1 = soft for people with a body weight of up to approx. 60 kg

Firmness level 2 = medium for people weighing up to approx. 80 kg

Firmness level 3 = firm for people with a body weight from approx. 80 kg

Firmness level 4 = extra firm for people with a body weight from approx. 100 kg

Attention: This gives you a very rough idea but may not always be true for your specific physique.

What makes a good cold foam mattress? The density makes all the difference.

One quality criterion for cold foam mattresses is their density, which must be at least 40 kg/m³.

What makes a good spring core mattress? The number of springs is key.

The crucial features of spring core mattresses are the number and diameter of the individual springs. The smaller the diameter of the individual springs, the higher the point elasticity and cuddliness of the mattress. A high number of springs implies that each individual spring has a small diameter.

One mattress for two? Best avoided!

If you are thinking about buying a double

mattress, let your advisor know. In order to take the individual requirements of both bed partners into account, two single mattresses are more suitable for double beds. Feeling a bed partner's every toss and turn on a double mattress can disturb a peaceful night's sleep.

Do you tend to sweat excessively? Do you suffer from a medical condition or an allergy to household dust?

Your advisor needs to know whether you are tend to sweat whilst sleeping, allergic to household dust, suffer from back pain, muscle tensions and cramps, or any medical condition such as rheumatism or osteoporosis. For people who sweat excessively when sleeping, a pocket spring core mattress is often the best choice due to the excellent air circulation inside the core of the mattress. However, the design of some foam mattresses now also allows a similarly intensive circulation of air, so that the mattress is well ventilated.

People who suffer from household dust allergies should consider a removable mattress cover which can be washed in temperatures of up to 60°C or higher. Special covers (encasements) that provide protection against dust mites are also available.

Don't forget the bed base

Before talking to your advisor, have a look at your bed base. Your new mattress must be suitable for your bed base, so that both elements can work together as one to ensure optimum sleeping comfort.

An old pillow with a new mattress?

Try it out!

Always try out a new mattress with a pillow, or even better, with a neck support pillow—and test the mattress lying on your back and on your side. Attention: If your shoulder sinks more deeply into your new mattress, you may also need to buy a new pillow to

TIPS FOR BUYING A MATTRESS

ensure optimum comfort when lying down.

Where should I take my old mattress?

Many specialists will dispose of your old mattress for you, sometimes even free of charge—it's always worth asking!

Beware of guarantees that are valid for more than 5 years: they can raise unrealistic expectations.

The lifespan of a mattress is between 7 and 10 years. For reasons of hygiene, a new mattress should really be replaced after 5 to 8 years. Therefore, guarantee periods that extend beyond 5 years should be treated with caution, as guarantees for 10 or 15 years or more are making claims about the product that no mattress can live up to.

Carefully examine the seal of approval and quality

Many seals of approval and quality for mattresses often use very different criteria to evaluate different characteristics.

You can find out about the origin, award and test methods for these seals of approval and quality from independent consumer bodies, such as the German consumer organisation, Stiftung Warentest, the German magazine, Ökotest, or German inspection bodies such as LGA and TÜV.

It is also advisable to ask for products that have been made in Germany or Western Europe.

Value for money is important but your personal comfort needs should be the decisive factor.

Mattresses exist in a very wide variety of quality levels and price ranges and therefore their "performance class" also vary significantly. However, here too, good quality comes at a price.

So not only should you weigh up your individual need for an excellent night's sleep

against your budget, but you should also think about the sense of well-being that your new mattress will give you by ensuring excellent sleeping comfort every day for many years to come.

Finding the right mattress—the proof of the pudding is in the... lying!

When buying a new mattress, it is extremely important to find the right balance between softness and support to match your own individual physique and personal preferences.

So it's important to try out different mattresses at your leisure in store. Many specialist stores also offer the possibility of testing your chosen mattress for a few nights at home. You can always enquire about this.

The right lying position

A good mattress which ensures that you get plenty of rest and relaxation throughout the night adapts seamlessly to the contours of your body. It gently cradles your entire body while providing flexible support, especially for your spine and pelvic area. The progressive layering of the mattress is also important. This means that the sleeping surface of the mattress allows your body to sink in softly and easily. At the same time, your body should still be supported by the core base of the mattress so that it is very easy to turn over on the mattress when asleep. This benefits the body's vital functions and promotes a healthy and restful sleep.

QUALITY AND COMFORT FEATURES

DENSITY: D

Quality features for foam mattresses

Density (abbreviated to D) is a quality criterion particular to foam materials. It is important for comfort foam, cold foam, memory foam, latex and gel foam mattresses. All foam materials are made up of specific amounts of air pockets or pores and of the gross mass of the material. Density reflects this ratio of material and air pockets in relation to a foam cube of 1 m³ in size. Density (D) is a type of key indicator which provides information about the durability or longevity of a mattress. The higher the density, the better the durability and quality of the foam used. Good foam mattresses have a density of at least 40 kg/m³.

BARREL POCKET SPRINGS

The number of spring elements indicates the level of quality and comfort of a barrel pocket spring core mattress

There is a wide range of spring mattresses with a variety of different quality levels such as straightforward spring cores, Bonnell spring cores or pocket springs. Some of the highest quality mattresses in this segment are those made with barrel pocket spring cores. Additional gradations that influence particular comfort properties are used within this high-grade product group of barrel pocket spring core mattresses. A good feature for assessing the quality of a barrel pocket spring core mattress is the number of spring elements contained in a standard size mattress of 90 x 200 cm. The more spring elements a barrel pocket spring core mattress contains, the better its ability to adapt to the shape of your body, and the higher its point elasticity and flexibility. This increases its comfort properties.

HEIGHT

Comfort feature for mattresses

The height or thickness of a mattress is an important criterion for the level of comfort and support that it offers. Good mattresses should have a height of at least 20 cm as they need to provide sufficient support and load-bearing capacity for an adult. Children can manage with lower mattress heights. Heights of 20 cm and above are also known as "comfort heights". They are most suitable for increasing the overall height of the bed or the sleeping surface, and therefore for making it easier to get in and out of bed.

COVER WASHABILITY AND CARE

Comfort feature for mattresses

The same elements that make a mattress beneficial for a good night's sleep can also be a drawback when it comes to washing and caring for the covers. Mattress covers are often designed as an additional comfort element in the sleep system and tend to have elaborate and voluminous padding. Yet from the point of view of hygiene, removable and washable covers are a must and it is essential that they can be washed at temperatures of up to 60°C.

Mattress covers are fitted with a zip to make them easier to remove. Zips which can be opened on three sides make it much easier to remove the cover and to fit it back on again after washing. However, mattress covers with zips on all four sides offer other advantages. These covers can be separated so that the top and bottom of the cover can also be washed individually. Separated covers are often easier to fit inside the drum of a conventional washing machine. Mattress covers which cannot be separated are double the volume which means they cannot fit in a domestic washing machine and instead need to be taken to professional cleaners. This is why it is also important to consider how easy the mattress cover is to wash when buying a mattress.

MADE IN GERMANY

Brinkhaus mattresses

Brinkhaus is a traditional German brand with a company history dating back to 1847, and still stands for reliable German premium quality today.

Brinkhaus mattresses are made exclusively in our own manufacturing plants in Germany.

Brinkhaus-brand mattresses are top quality, made in Germany.

PICTOGRAMS

EXPLAINED IN BRIEF

SLEEPING COMFORT

7-zone mattresses

The core of the mattress is divided into 7 lying zones which are adapted to the ergonomic requirements of the various parts of your body. Mattresses divided into different body zones ensure optimised pressure-relief and create the best conditions for body relaxation while you sleep.

Dry sleeping climate

The core of the mattress ensures good ventilation and promotes a healthy and dry sleeping climate for a comfortable sleep.

HEIGHT 22 CM

Comfort height

Mattresses with a height of at least 20 cm are known as "comfort mattresses" and offer the best pressure-relief.

MATERIAL QUALITY

TTFK 500

Barrel pocket spring core – 500

These barrel pocket spring core mattresses (TTFK) contain 500 spring elements for a spring core size of 100 x 200 cm. These mattresses offer a good level of comfort to support the body.

TTFK 1000

Barrel pocket spring core – 1000

These barrel pocket spring core mattresses (TTFK) contain 1000 spring elements for a spring core size of 100 x 200 cm. These mattresses offer a very good level of comfort to support the body.

TTFK 2000

Barrel pocket spring core – 2000

These barrel pocket spring core mattresses (TTFK) contain 2000 spring elements for a spring core size of 100 x 200 cm. These mattresses offer an excellent level of comfort to support the body.

D 40

Density – D 40

The foam used has a density of 40 kg/m³ and represents good quality and durability.

D 55

Density – D 55

The foam used has a density of 55 kg/m³ and represents very good quality and durability.

CARE PROPERTIES

4-SIDES

A mattress cover with a zip on all 4 sides that can be separated. This means that the top and bottom of the cover can be washed separately.

COVER WASHABLE

60°C

The mattress cover is removable and hygienically washable up to 60°C.

ROM KS

ROM KS

THE COLD FOAM MATTRESS

Brinkhaus

ROM KS

THE COLD FOAM MATTRESS

The ROM KS is a high-quality 7-zone cold foam mattress. The surface of the point-elastic cold foam core features 3D cube cut technology. The shoulder area is gently recessed. It softly cradles your shoulder, ensuring excellent pressure-relief in this area. The pelvic area sinks gently into the channelled surface, receiving optimum support from the core base.

The traditional all-round mattress cover is fitted with looped handles, making it easier to turn the mattress.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus ROM KS mattresses are made exclusively in Germany and stand for premium brand quality.

- 7-zone cold foam mattress
- Progressive layering of the mattress—smooth transition from a soft point-elastic surface to greater firmness and support in the core
- Removable cover washable up to 60°C
- Cover with zip on 4 sides, cover is separable—top and bottom can be washed separately
- 4 looped handles make it easier to turn the mattress
- Brand-name quality, made in Germany

THE BARREL POCKET SPRING CORE MATTRESS

Brinkhaus

GENUA TTFK

THE BARREL POCKET SPRING CORE MATTRESS

The GENUA TTFK is a high-quality 7-zone barrel pocket spring core mattress with a Rhombo-therm top layer made of extra-soft foam on both sides. The wonderfully soft surface lets your body gently sink into the mattress. Thanks to the progressive layering of the mattress, your body receives excellent support from the high-quality barrel pocket spring core. Mattresses with barrel pocket springs also ensure very good ventilation and an excellent dry sleeping climate. The mattress also offers additional support when sitting on the edge thanks to the reinforced edge support, which can also make it easier to get up from a sitting position.

The traditional all-round mattress cover is fitted with looped handles, making it easier to turn the mattress. The grey climate band on all sides of the mattress not only gives it a classy accent but also promotes ventilation, activated by the body's movements, for a dry sleeping climate.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus GENUA TTFK mattresses are made exclusively in Germany and stand for premium brand quality.

- 7-zone barrel pocket spring core mattress with pleasantly soft Rhombo-therm top layer and reinforced edge support
- Progressive layering of the mattress—smooth transition from a soft point-elastic surface to greater firmness and support in the core
- Removable cover washable up to 60°C
- Cover with zip on 4 sides, cover is separable—top and bottom can be washed separately
- 4 looped handles make it easier to turn the mattress
- Climate band promotes air circulation and a dry sleeping climate
- Brand-name quality, made in Germany

MALAGA KS

THE COLD FOAM MATTRESS

Brinkhaus

MALAGA KS

THE COLD FOAM MATTRESS

The MALAGA KS is a high-quality 7-zone cold foam mattress with two different sides for optimum sleeping comfort. The point-elastic cold foam core features 3D cube cut technology and has an additional Rhombo-therm top layer made of gel-infused foam material on one side. Gel-infused foam is a very fine-pore, ultra soft cold foam with a tangibly high level of elasticity which ensures dreamlike, pressure-relieving sleeping comfort.

The base core design has a gently recessed shoulder area. It softly cradles your shoulder, ensuring excellent pressure relief in this area. The pelvic area sinks in gently, receiving optimum support from the core base.

The extremely flexible mattress cover is made as an all-round cover with looped handles that make it easier to turn the mattress. The grey climate band on all sides of the mattress not only gives a classy accent but also promotes ventilation of the mattress, ensuring a dry sleeping climate. Every movement of the body causes air to circulate in the core of the mattress, helping to wick away moisture and dissipate heat.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus MALAGA KS mattresses are made exclusively in Germany and stand for premium brand quality.

THE COLD FOAM MATTRESS

Brinkhaus

MARSEILLE KS

THE COLD FOAM MATTRESS

The MARSEILLE KS is a high-quality, point-elastic 7-zone cold foam mattress with a soft shoulder zone. The surface is lightly contoured due to slat-cut technology and comfortably cushions the body. The material recesses in the shoulder area allow your shoulder to sink in very softly. The 4 core inserts, made of firm foam material, in the pelvic area of the mattress give this part of the body significant support.

The traditional all-round mattress cover is fitted with looped handles, making it easier to turn the mattress. The grey climate band on all sides of the mattress not only gives it a classy accent but also promotes ventilation, activated by the body's movements, for a dry sleeping climate.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus MARSEILLE KS mattresses are made exclusively in Germany and stand for premium brand quality.

Brinkhaus

VALENCIA TTFK

THE BARREL POCKET SPRING CORE MATTRESS

The VALENCIA TTFK mattress is a 7-zone barrel pocket spring core mattress with an extremely high level of comfort and quality features. This mattress optimally combines the comfort properties of pocket spring core and cold foam materials. The extremely good point-elastic barrel pocket spring core is fitted with a comfort top layer made of high-class cold foam with micro 3D cut technology on both sides. The extremely flexible barrel pocket springs provide great point-elasticity while perfectly supporting the body. This is sleeping comfort par excellence!

The mattress cover has a high-quality side cover with handles for turning that are sewn on flat so that they do not stick out under fitted sheets. On side covers, the sides are reinforced with special quilting. This is not only visually attractive, but is also advantageous when two mattresses of this type are used on a double bed. The gap between the mattresses (sometimes referred to as the "visitor's gap") is significantly reduced.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus VALENCIA TTFK mattresses are made exclusively in Germany and stand for premium brand quality.

- High-quality 7-zone barrel pocket spring core mattress with top-class cold foam top layer

NEAPEL TTFK

THE BARREL POCKET SPRING CORE MATTRESS

The NEAPEL TTFK mattress is a special barrel pocket spring core mattress with what is known as a “high-low” barrel pocket spring core for intensive point-elasticity and a very high level of comfort and quality features. The high-quality latex top layers gently accommodate the contours of the body and promote a dry sleeping climate. The extremely flexible barrel pocket springs offer a high level of point-elasticity and support the body with their 7 ergonomically arranged zones. The ability of the mattress to dissipate heat and wick away moisture is excellent as air is allowed to circulate freely inside the mattress.

The mattress cover has a high-quality side cover with handles for turning that are sewn on flat so that they do not stick out under fitted sheets. On side covers, the sides are reinforced with special quilting. This is not only visually attractive, but is also advantageous when two mattresses of this type are used on a double bed. The gap between the mattresses (sometimes referred to as the “visitor’s gap”) is significantly reduced.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus NEAPEL TTFK mattresses are made exclusively in Germany and stand for premium brand quality.

VENEDIG TTFK

VENEDIG TTFK

THE BARREL POCKET SPRING CORE MATTRESS

Brinkhaus

VENEDIG TTFK

THE BARREL POCKET SPRING CORE MATTRESS

The VENEDIG TTFK mattress is a high-quality barrel pocket spring core mattress with an integrated topper for ideal, relaxing sleeping comfort. The highlight of the mattress is the choice of two comfort variants for the removable topper. Choose between a soft or a slightly firmer topper core.

The inner core of the mattress contains a high-quality barrel pocket spring core with very high point-elasticity which comfortably absorbs the 7 zones of the body while providing it with comfortable support.

The mattress cover has a high-quality side cover with handles for turning that are sewn on flat so that they do not stick out under fitted sheets. On side covers, the sides are reinforced with special quilting. This is not only visually attractive, but is also advantageous when two mattresses of this type are used on a double bed. The gap between the mattresses (sometimes referred to as the “visitor’s gap”) is significantly reduced.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus VENEDIG TTFK mattresses are made exclusively in Germany and stand for premium brand quality, made in Germany.

- 7-zone barrel pocket spring core mattress with integrated topper for a selectable level of comfort
- Progressive layering of the mattress—smooth transition from a soft point-elastic surface to greater firmness and support in the core
- Mattress ventilation promoted by climate band
- Removable cover washable up to 60°C
- Cover with zip on 4 sides, cover is separable—top and bottom can be washed separately
- 4 flat stitched-on straps make it easier to turn the mattress and do not stick out under fitted sheets
- Brand-name quality, made in Germany

PALERMO TTFK

THE BARREL POCKET SPRING CORE MATTRESS

The PALERMO TTFK mattress is a premium barrel pocket spring core mattress with an all-round ventilation system. The core's surface has a high-quality Soft-Therm top layer which softly accommodates the contours of the body while providing the mattress with outstanding ventilation. Inside the inner core of the mattress, there is a number of high quality micro barrel pocket springs with very high point-elasticity which outline the 7 zones of the body while providing it with perfect comfortable support.

The mattress cover has a high-quality side cover with handles for turning that are sewn on flat so that they do not stick out under fitted sheets. On side covers, the sides are reinforced with special quilting. This is not only visually attractive, but is also advantageous when two mattresses of this type are used on a double bed. The gap between the mattresses (sometimes referred to as the "visitor's gap") is significantly reduced.

The removable cover has a zip on all 4 sides. The advantage of this is that the cover can be separated. The top and bottom of the mattress cover can therefore also be washed separately at up to 60°C.

Brinkhaus PALERMO TTFK mattresses are made exclusively in Germany and stand for premium brand quality.

MATTRESS COVERS

When you want increased sleeping comfort, a topper is often the right choice. A topper is an additional layer placed on top of a mattress which makes it possible to upgrade the sleeping comfort of the mattress. On the one hand, a mattress topper can clearly help to improve the softness and point-elasticity of a mattress. If you suffer from rheumatism or osteoporosis, toppers can be a great aid for ensuring a pressure-relieving, restful sleep. On the other hand, a topper also helps to increase the overall height of the bed. This makes getting in and out of bed easier and more comfortable. Changing fitted sheets is also easier and less strenuous than with a conventional mattress.

Toppers are also becoming increasingly popular for use in mobile homes or caravans to improve the sleeping quality of mattresses.

The range of Brinkhaus toppers offers a good and balanced variety that takes into account very diverse comfort preferences. All toppers are fitted with comfortable, removable covers which can be washed at up to 60°C.

- Optimised sleeping comfort and additional softness for mattresses
- Provides additional point-elasticity and improved pressure relief
- Increases the overall height of the bed
- Hygienic mattress protection
- Makes it easier and less strenuous to change fitted sheets
- Removable cover washable up to 60°C

MATTRESS PROTECTORS

... make sure you get a restful night's sleep and wake up relaxed.

Reliably protect mattresses and sleep products with innovative products offering smart, comfortable solutions. Protectors reliably provide the ideal level of hygiene and well-being at every stage of life and discreetly conceal your little secrets.

MATTRESS PROTECTORS

MATTRESS PROTECTORS

COVERS, UNDERLAYS, FITTED SHEETS

Brinkhaus

MATTRESS PROTECTORS

COVERS, UNDERLAYS, FITTED SHEETS

Professional mattress protection products can reliably protect mattresses against moisture, keep them clean, or stop them from slipping out of place, for example when used to keep mattresses safely in position on box spring beds.

Our varied range of mattress protectors extends from mattress covers and fitted sheets, which keep the sleeping surface of the mattress clean from above, to mattress underlays, which protect mattresses against wear and tear caused by the slats and/or stop them slipping out of place.

This range of mattress protectors can be used in all kinds of manners and environments. They offer a professional solution to various issues associated with mattress protection.

All of the products are very easy to care for, highly durable and easy to use hygienically. And last but not least, they play a major role in extending the mattresses' lifetime.

The reliable way to unwind and enjoy your relaxed atmosphere!

- *Mattress covers – for optimal hygienic protection of the mattress from above*
- *Mattress underlays – protect the underside of the mattress against slipping and/or wear and tear*
- *Fitted sheets – provide the ideal level of hygienic protection from the top and sides*

FREJA

MATTRESS COVER

PRODUCT CHARACTERISTICS

- ➔ Keeps the mattress clean
- ➔ Healthy, pleasant sleeping environment
- ➔ Moisture-regulating
- ➔ Stays perfectly in place thanks to elastic corner straps

Suitable for every need

No two bed structures are the same.

For that reason, this cover is available for different mattress depths:

COVERS AND FITTED SHEETS

STANDARD to fit a mattress depth of up to 22 cm

TOPPER to fit a topper depth of 6 cm to 14 cm
SHORTENED ELASTICATED STRAPS

MAXI to fit a mattress depth of 23 cm to 30 cm
EXTENDED ELASTICATED STRAPS

SPLIT COVERS

for double beds with separately adjustable head ends

To fit unilateral split mattresses.

FEATURES

- Design** Double-face cotton with kalmuck weave, brushed on both sides, Sanforised, off-white
- Material** 100 % cotton
- Finish** Edges fully finished with cotton bias tape, four elastic corner straps sewn on
- Weight per unit area** approx. 420 g/m²
