OEKO-TEX® STANDARD 100 is a worldwide, consistent, independent testing and certification system for textile raw materials and semi-finished and finished textile products at all processing levels, as well as accessory materials used. Further information is available at: [www.oeko-tex.de](http://www.oeko-tex.de)

**CYCLAFILL® FIBRES** are made from 100% recyclable polyester. The product used as the basis for these sustainable, environmentally friendly polyester fibres is recycled PET bottles. This brand fibre is hard-wearing, durable, soft and snug. Cyclafill® conserves our planet's resources and contributes to a sustainable future.

**TESTED DOWN AND FEATHERS**

Only down and feathers from controlled animal husbandry are used. The breeding farms undergo on-site inspections: cages and force-feeding are banned, and all forms of removing feathers from live animals are prohibited. Suitable poultry pens, a sufficient supply of feed and fresh water, protection against diseases and natural predators and care by competent personnel are basic requirements.

Further information is available at: [www.downpass.com](http://www.downpass.com)

**IDEAL FOR HOUSE DUST ALLERGY SUFFERERS**

The NOMITE mark indicates that the product is suitable for people who are allergic to house dust. This is because feather-filled and down-filled bedding, with its warmth and climatic conditions so favourable for humans, is a very unfavourable environment for moisture-dependent mites.

Further information is available at: [www.nomite.de](http://www.nomite.de)

**HELP US KEEP THE OCEANS CLEAN!**

Aerelle® blue fibre is the result of a partnership with Plastic Bank, a social enterprise. It's made of plastic that could otherwise have ended up in the ocean. Recycled to make Social Plastic®, it helps solve one of the most pressing environmental problems of our time, namely the plastic polluting seas and beaches. Plastic Bank encourages people to collect plastic waste in order to sustainably protect the environment.

Further information is available at: [www.plasticbank.com](http://www.plasticbank.com)

Products certified to the **THE ORGANIC CONTENT STANDARD (OCS)** contain organically grown content that has been (independently) verified at each stage of the supply chain, from the farm to the finished product.

*For our environment.*

# GOOSE DOWN DUVETS

## GOOSE DOWN FROM ANIMAL-FRIENDLY SOURCES

The warm Brinkhaus Blue Down Duvet provides wonderful cosy comfort. Fine, white new goose down and feathers in a ratio of 90/10% covered by a pure, very soft peach-skin cotton fabric promote blissful sleep. The puffy, airy down filling regulates humidity and is very breathable, creating dry sleeping conditions.

### THE FEATURES

Casing	finest 100% mako cotton batiste, TC 307 – 100% OCS organically grown material, certified by CU 1036569
Filling	new, white Masurian free-range goose down and feathers, class 1, DIN EN 12934, 90% down
Design	button hem and button holes – duvets can be combined with each other by buttoning them together
Washable	up to 60°C
Colour	white
